

Tankclean

Description

TANKCLEAN is an industrial strength water conditioner that has been developed for use in rain water harvesting systems and water storage tanks.

TANKCLEAN is formulated for South African conditions

TANKCLEAN treated water can be used 30 minutes after treatment

Advantages

TANKCLEAN is a concentrated solution which is extremely cost effective

TANKCLEAN will minimise odours that are associated with rain harvested water

TANKCLEAN will discourage the breeding of mosquitoes

TANKCLEAN is safe for humans, pets, wildlife and plants

TANKCLEAN is 100% environmentally friendly

Water treated with TANKCLEAN can be used to fill Swimming Pools and in the garden

Application

Rain harvesting tanks

Water reservoirs

Dosing

TANKCLEAN can be added directly into the tank

Add product according to the volume of water in the tank

For best results, TANKCLEAN should be added every 30 days if the water is not being used.

Dilutions

1 litre of TANKCLEAN will treat 20 000 litres of water

Pack sizes 250ml and 500ml. Bulk packaging on request
